emPerform™

5 Ways
an emPerform integration will make you smile

When looking at your HR technology stack, if you aren't planning for data integration and single sign on, you are missing out. See below for the top 5 reasons why integrating data from your existing HR systems with emPerform will turn that frown upside down and set you up for success.

1

Save Time & Work:

HR teams have better things to do than manually enter and re-enter employee data. Eliminate duplicate manual data entry and human error with a streamlined feed of the most up to data employee data from your HR system.

2

Gain Trust & Security:

Things change every day! With an automated data feed, you and your users can rest easy knowing information is always secure and accurate in emPerform.

3

Boost Accessibility:

The last thing your users want is another username and password to remember (or not). By enabling single sign on (SSO) with emPerform, your users can access reviews and check-ins using their existing credentials. Easy as that.

4

Scale & Grow:

As your company changes, it is critical that your HR tools grow with you. emPerform data connectors and integrations allow you to scale as needed.

5

It's Easy:

Worried that an integration is too much work? Don't. We handle everything for you. Once set up, emPerform will automatically pull employee master data from your existing HR system so the flow of information is 100% streamlined. **Get started.**

Whether you are using ADP,® UKG,® Dayforce,® Microsoft™ Dynamics,® Paychex,® Payworks,® JD Edwards,® HRWare,® BambooHR,® Oracle,® Lawson,® Active Directory, OKTA, or any other core HRIS, ERP, or payroll system, our secure and affordable data integration and single sign on options have you covered!
